TECHNICAL SPECIFICATIONS COMPRESSION LOCK WITH KEY

General Technical Specifications

The following details the common characteristics for this type of hardware according to the standard models available:

- **Material:** High-quality zinc alloy with thickened locking arm and steel screws.
- **Finish:** Black powder coating (powder coated) for resistance to corrosion and oxidation.
- **Mechanism of Action:** Compression closure manually operated by an adjustable sealing lever that ensures a firm and airtight seal.
- **Security:** Includes key lock (frequently the **CH751 model**) and comes with 2 keys.
- **Installation Dimensions:**
    - **Panel thickness:** Generally compatible with panels from **1 to 11 mm** or up to **14 mm** depending on the model.
    - **Grip range:** Adjustable, commonly between **1 mm and 25 mm** , or specific ranges such as **36-48 mm** for outdoor use.
    - **Approximate external dimensions:** 110 mm high x 50 mm wide.
