TECHNICAL DATA SHEET FOR TUBE FLOW METER

- The sensor is made of 316 stainless steel, which is corrosion-resistant, rust-free, vibration-proof, and explosion-proof . It provides a stable output signal and accurate measurement.
- The fuel level gauge has IP67 waterproof, dustproof, and anti-fog curved glass. Gauge range E-1/2-F 52 mm 0-190 ohm.
- Fuel level gauge, great feature with its lower power consumption, longer lifespan, higher accuracy, etc., with good resistance and anti-vibration.
- SAE 5-hole mounting pattern, with M5 screws and gasket, easy to install and connect. Sensor signal output: 0-190 ohms.
- Suitable for boats, cars, trucks, buses, and marine applications. Suitable for fuel level gauges, water level gauges, and any type of liquid without impurities.
