

TECHNICAL DATA SHEET – THREE-PIPE ASSEMBLY

Product Description

The 3-tube mechanical fuel sender is constructed from durable metal and provides a complete solution by integrating the three tubes: suction, return, and ventilation. Its robust and standardized design ensures compatibility with multiple fuel systems. Thanks to its extraction tube with filter and efficient suction system, this fuel sender delivers consistent performance even under demanding conditions.

Technical Specifications

Main specifications:

- Suction, return, and vent tube diameter: 6 mm internal / 8 mm external or 8 mm internal / 10 mm external
- Wall thickness for all tubes: 1 mm
- Total sender length: 340 mm
- Suction tube length: 300 mm
- Distance between mounting bracket and tubes: 30 mm
- Mounting bracket diameter: 73 mm
- Radius from bracket to screw center: 28.5 mm
- Screw hole diameter: 5 mm
- Angle between holes: 72 degrees
- Material: Metal
- Weight: 0.2 kg
